

Ecological pyramid: diagram that shows the relative amounts of energy or matter contained within each trophic level

Pyramid of Energy: shows the relative amount of energy available at each trophic level. Only 10% of energy available is transferred to the next trophic level, the rest is lost as heat

Pyramid of Biomass: shows the amount of living tissue (available food) within each trophic level available for the next trophic level (**g/m^2**)

Pyramid of Numbers: shows the relative number of organisms at each trophic level (**population size**)

Pyramid of Numbers

Pyramid of Biomass

Pyramid of Energy
